EDUCATION

B.S. Software Engineering

California Polytechnic State University of San Luis Obispo

09/2021-06/2025

Courses:

- Data Structures
- Project-based Object-Oriented Programming and Design
- Systems Programming
- Individual Software Design and Development

TECHNICAL SKILLS

Java

Python

CSS

Spring Boot

C

HTML

PROJECTS

Garden Harvest Data Collector

Aug 2023 - Present

I initiated the development of a web application using Spring Boot to help gardeners input their garden yields and calculate yearly nutritional values. The tech stack includes MongoDB for the backend and HTML, CSS, and Vanilla JS for the frontend. I've also created a RESTful API to connect these components. It's still a work in progress and I am currently implementing a means to process a large amount of data based on weight instead of yield amount.

Camp Poly Hacks

November 2021, San Luis Obispo CA

Four other students and I were challenged to solve a transportation conflict in San Luis Obispo. We created a wire framed app that incentivized riding the bus for students by gamifying the process. After creating the prototype we were given the task of creating a pitch trying to sell our idea to a panel of judges.

SLO Hacks

January 2022, San Luis Obispo CA

A group of two other students and I work together to create a prototype psychological resource website named H.U.G.S (Humans Utilizing Great Services). Our objective was to create a service for college students that was affordable, private, and connecting students with their proper means of help.

EXPERIENCE

Hack4Impact / Developer

October 2023 - Present

Hack4Impact is nonprofit organization striving to connect student software developers with other nonprofit companies to create means of social change through the utilization of software. I am currently in their five week bootcamp where I am learning MongoDB, Express.js, React.js, Next.js, and Node.js.

East Village Cafe / Barista

July 2022 - Sept 2023

I worked behind the bar where I learned to make a variety of coffee and tea based drinks, and providing excellent customer service. I was responsible for working the front register as well as closing the cafe at the end of the day.

Accomplishments:

- I helped develop and optimize the workflow of the cafe ensuring a smooth and coherent process to make the expediting process as smooth as possible.
- Worked on a variety of other projects such as solving plumbing issues, remodeling, and electrical work.

Carmel Classics / Floor Salesperson

May 2021- Sept 2021

Some of the tasks that I was accountable for were restocking the store, greeting customers, working the register, and selling products to customers.
